

19. $[0,1] \times [0,1] \times [0,1]$

$\{x \in \mathbb{R} : 0 \leq x \leq 1\}$ $x, \dots, x, \dots$

$\mathbb{R}^2 \rightarrow$ coordinate plane

$\mathbb{R}^3 \rightarrow$ 3-D space

$[0,1]$

$\{x \in \mathbb{R} : 0 \leq x \leq 1\}$

subset:-

$A = \{0, 2, 4\}$

$B = \{0, 1, 2, 3, 4\}$

$C = \{0, 1, 7, 8\}$

$\rightarrow A$ is a subset of B .

$A \subseteq B$

$\rightarrow C \not\subseteq B \rightarrow$ یعنی C نیست.

$\Rightarrow$ there's at least one element in C which is not in B .

$\exists x \in C : x \notin B \rightarrow$ there exists for which

$\forall x \in C : x \in B \rightarrow$ for all ... does not imply ...
