

$$\underline{P \Rightarrow Q} \quad \neq \quad \underline{Q \Rightarrow P}$$

$Q \Rightarrow P$ is
converse of
 $P \Rightarrow Q$

P : multiple of 6

Q : divisible by 2

$d=4$

P	Q
T	T
T	F
<u>F</u>	<u>T</u>
F	F

$$P \Rightarrow Q$$

T
F
T
T

$$Q \Rightarrow P$$

T

biconditional statements: - $\Leftrightarrow$

P : is even.

Q : is divisible by 2

$$P \Rightarrow Q$$

$$Q \Rightarrow P$$

$$P \Leftrightarrow Q$$

P if and only if Q . $P \text{ iff } Q$

P implies Q , and conversely.
